Profile

I am a London based developer with two years commercial experience, one being within the games industry. Though I am predominately an Actionscript & Objective C programmer, I have learnt many other languages through various projects.

I am tech savvy, having always maintained a keen interest in latest technology developments and spend my spare time engaging myself in projects and research to further my development skills.

I wish to be able to contribute my skills to a team where I will constantly be challenged and learn new things.
